

REVENUE OPERATIONS BLUEPRINT

We sell single-origin coffee online in the Philippines, mostly subscriptions and hampers. | E-commerce | Prepared 18 September 2026

1. Executive summary

We sell single-origin coffee online in the Philippines, mostly subscriptions and hampers. You currently bring in about 400 leads a month and close 150 (38%), running on no CRM (manual tracking) with Mailchimp, Shopify, Google Ads. This blueprint moves you to Sales Hub Professional plus Marketing Hub Professional, installs a single-call pipeline across 3 lead sources, and works towards: 30 percent more revenue in six months.

Estimated cost of inaction: PHP 69,000 per month.

2. Recommended HubSpot stack

- Core: Sales Hub Professional
- Add-on: Marketing Hub Professional
- 2 hub(s) x 3 seats x USD 90 per seat per month = approx. USD 540 per month

List price, USD per seat per month, from knowledge base v1. Regional and committed pricing varies. Confirm at the build call.

- Sales Hub Professional is the floor: the build requires workflows, and Starter cannot run them.

3. Pipeline architecture

Single-call pipeline (one-call close). Every stage can advance on one conversation. Speed and first-response time are the differentiators.

- Stages: New > Contacted > Qualified > Proposal > Closed Won > Closed Lost
- Workflow: Abandoned-cart sequence (2 touches)
- Workflow: Win-back for customers inactive 60 days
- Workflow: Post-purchase review request

4. Lead source architecture

- Instagram (200/mo, tracked): Social landing forms with UTM tracking. Point the best posts at a dedicated landing page
- Google (80/mo, tracked): HubSpot form with a source field and monthly volume tracking
- Email (120/mo, tracked): Import with a source property, then a re-engagement sequence

5. Tool mapping (current -> recommended)

- Mailchimp -> Consolidate. Move lists and email into Marketing Hub to end the double entry.
- Shopify -> Keep. Connect orders to HubSpot so revenue sits beside the sales data.
- Google Ads -> Keep. Connect to HubSpot Ads for automated tracking and contact-level reporting.

6. Build plan

Confirmed defaults (included in the tier):

- Contact, company, and deal objects
- Email sync for every sales seat
- Pipelines, deal stages, and basic dashboards
- Task management and reminders

- Sequences (included with Professional)

Custom items to create for you:

- Pipeline: e-commerce pipeline with 6 stages, matched to your one-call close pattern
- Custom properties from your answers: product, list price, deal size, fulfilment status, and lead source volume
- Form and tracking for: Instagram
- Form and tracking for: Google
- Form and tracking for: Email
- Workflow: Abandoned-cart sequence (2 touches)
- Workflow: Win-back for customers inactive 60 days
- Workflow: Post-purchase review request
- Dashboard: monthly leads, closed deals, close rate, and pipeline value by source

7. Cost of inaction (from your numbers)

Deals lost to slow follow-up PHP 60,000 (per month)

Basis: 400 leads in, 150 closed, 250 slipping each month. Assumption: 20% of slipped deals are winnable with faster follow-up. Valued at PHP 1,200 typical deal.

Value leaking from unmanaged hand-offs PHP 9,000 (per month)

Basis: You close 150 deals a month. Assumption: 5% leak between sales and fulfilment without a system of record. Valued at PHP 1,200 typical deal.

Closing a 30% growth gap PHP 324,000 (over 6 months)

Basis: Your goal states 30% more. That is 45 extra deals a month at PHP 1,200, over six months.

Total estimated cost of inaction: PHP 69,000 per month, PHP 738,000 over six months.

8. Compliance

No compliance flags in knowledge base v1 for this vertical.

9. Next steps

- 1. Book the 30-minute call to walk through this blueprint (scheduler below).
- 2. Confirm scope: hubs, seats, and the custom items list in section 6.
- 3. Launch in 2 to 3 weeks, then a 30-day tuning review of workflow performance.
