

REVENUE OPERATIONS BLUEPRINT

We install residential and commercial solar systems for homeowners and small businesses in | Solar | Prepared 23 September

1. Executive summary

We install residential and commercial solar systems for homeowners and small businesses in Ilocos. You currently bring in about 55 leads a month and close 12 (22%), running on HubSpot with Microsoft Excel, WhatsApp, Google Ads, Meta Ads. This blueprint moves you to Sales Hub Professional plus Marketing Hub Professional, installs a two-call pipeline across 3 lead sources, and works towards: 20 closed installs a month. Estimated cost of inaction: PHP 16,200,000 per month.

- Leads / month: 55
- Closed / month: 12
- Close rate: 22%
- Typical deal: PHP 1,500,000

2. Recommended HubSpot stack

- Core: Sales Hub Professional
- Enterprise review: no
- Add-on: Marketing Hub Professional
- 2 hub(s) x 3 seats x USD 90 per seat per month = approx. USD 540 per month

List price, USD per seat per month, from knowledge base v1. Regional and committed pricing varies. Confirm at the build call.

- Sales Hub Professional is the floor: the build requires workflows, and Starter cannot run them.

3. Pipeline architecture

Two-call pipeline (two-call close). First call qualifies, second call closes. The gap between calls is exactly where deals slip without workflows.

- Stages: New > Contacted > Qualified > Consult scheduled > Consult done > Proposal > Closed Won > Closed Lost
- Workflow: Missed-call text-back within 5 minutes
- Workflow: 3-touch proposal follow-up over 14 days
- Workflow: Review-and-sign reminder 48 hours before the appointment

4. Lead source architecture

- Google Ads (25/mo, tracked): Connected ad account with automated campaign, ad group, and contact reporting
- Facebook (18/mo, tracked): Social landing forms with UTM tracking. Point the best posts at a dedicated landing page
- Walk-ins (10/mo, not tracked): Mobile quick-capture form, plus a 30-day manual entry discipline while the habit forms

5. Tool mapping (current -> recommended)

- HubSpot -> Upgrade. You are on Starter. You are on the entry tier. This build needs workflows, so Professional is the floor. Move up rather than restart.

- Microsoft Excel -> Consolidate. Move tracking into HubSpot objects and properties. Keep Excel for one-way reports while the habit forms.
- WhatsApp -> Keep. Connect it to HubSpot so conversations attach to the right contact and deal.
- Google Ads -> Keep. Connect to HubSpot Ads for automated tracking and contact-level reporting.
- Meta Ads -> Keep. Connect to HubSpot Ads. Route the best-landing ads to a dedicated landing form.

6. Build plan

Confirmed defaults (included in the tier):

- Contact, company, and deal objects
- Email sync for every sales seat
- Pipelines, deal stages, and basic dashboards
- Task management and reminders
- Sequences (included with Professional)

Custom items to create for you:

- Pipeline: solar pipeline with 8 stages, matched to your two-call close pattern
- Custom properties from your answers: product, list price, deal size, fulfilment status, and lead source volume
- Form and tracking for: Google Ads
- Form and tracking for: Facebook
- Form and tracking for: Walk-ins (currently untracked, this brings it into view)
- Workflow: Missed-call text-back within 5 minutes
- Workflow: 3-touch proposal follow-up over 14 days
- Workflow: Review-and-sign reminder 48 hours before the appointment
- Dashboard: monthly leads, closed deals, close rate, and pipeline value by source

7. Cost of inaction (from your numbers)

Deals lost to slow follow-up PHP 12,900,000 (per month)

Basis: 55 leads in, 12 closed, 43 slipping each month. Assumption: 20% of slipped deals are winnable with faster follow-up. Valued at PHP 1,500,000 typical deal.

Value hiding in untracked sources PHP 3,300,000 (per month)

Basis: 10 leads a month are untracked today. Assumption: they close at your 22% rate. Valued at PHP 1,500,000 typical deal.

Gap to your six-month goal of 20 installs a month PHP 72,000,000 (over 6 months)

Basis: Target 20 installs a month versus 12 today. That is 8 extra installs at PHP 1,500,000 each, over six months.

Total estimated cost of inaction: PHP 16,200,000 per month, PHP 169,200,000 over six months.

8. Compliance

- TCPA: Outbound follow-up to solar leads requires documented consent. Use opt-in forms, keep the consent timestamp, and honour do-not-contact requests immediately.

9. Next steps

1. Book the 30-minute call to walk through this blueprint (scheduler below).
2. Confirm scope: hubs, seats, and the custom items list in section 6.
3. Launch in 2 to 3 weeks, then a 30-day tuning review of workflow performance.
