

REVENUE OPERATIONS BLUEPRINT

We do aircon and plumbing service and installation for homes in and around Ilocos. | Home services | Prepared 28 September

1. Executive summary

We do aircon and plumbing service and installation for homes in and around Ilocos. You currently bring in about 90 leads a month and close 18 (20%), running on no CRM (manual tracking) with WhatsApp, Google Ads. This blueprint moves you to Sales Hub Professional, with Enterprise review, installs a two-call pipeline across 3 lead sources, and works towards: 25 completed jobs a month. Estimated cost of inaction: PHP 316,800 per month.

- Leads / month: 90
- Closed / month: 18
- Close rate: 20%
- Typical deal: PHP 12,000

2. Recommended HubSpot stack

- Core: Sales Hub Professional, with Enterprise review
- Enterprise review: yes
- 1 hub(s) x 4 seats x USD 90 per seat per month = approx. USD 360 per month

List price, USD per seat per month, from knowledge base v1. Regional and committed pricing varies. Confirm at the build call.

- Sales Hub Professional is the floor: the build requires workflows, and Starter cannot run them.
- Recommend Enterprise when team size, cycle length, or lead volume reaches the top of the Professional band.

3. Pipeline architecture

Two-call pipeline (two-call close). First call qualifies, second call closes. The gap between calls is exactly where deals slip without workflows.

- Stages: New > Contacted > Qualified > Consult scheduled > Consult done > Proposal > Closed Won > Closed Lost
- Workflow: Missed-call text-back within 5 minutes
- Workflow: Quote-sent nudge after 3 days
- Workflow: Review request after job completion

4. Lead source architecture

- Website (35/mo, tracked): Marketing Hub form on landing pages, with UTM tracking on all traffic
- Phone calls (50/mo, not tracked): Mobile quick-capture form, plus a 30-day manual entry discipline while the habit forms
- Referrals (10/mo, not tracked): Referral landing form plus a shareable tracking link for every customer

5. Tool mapping (current -> recommended)

- WhatsApp -> Keep. Connect it to HubSpot so conversations attach to the right contact and deal.
- Google Ads -> Keep. Connect to HubSpot Ads for automated tracking and contact-level reporting.

6. Build plan

Confirmed defaults (included in the tier):

- Contact, company, and deal objects
- Email sync for every sales seat
- Pipelines, deal stages, and basic dashboards
- Task management and reminders
- Sequences (included with Professional)

Custom items to create for you:

- Pipeline: home services pipeline with 8 stages, matched to your two-call close pattern
- Custom properties from your answers: product, list price, deal size, fulfilment status, and lead source volume
- Form and tracking for: Website
- Form and tracking for: Phone calls (currently untracked, this brings it into view)
- Form and tracking for: Referrals (currently untracked, this brings it into view)
- Workflow: Missed-call text-back within 5 minutes
- Workflow: Quote-sent nudge after 3 days
- Workflow: Review request after job completion
- Dashboard: monthly leads, closed deals, close rate, and pipeline value by source

7. Cost of inaction (from your numbers)

Deals lost to slow follow-up PHP 172,800 (per month)

Basis: 90 leads in, 18 closed, 72 slipping each month. Assumption: 20% of slipped deals are winnable with faster follow-up. Valued at PHP 12,000 typical deal.

Value hiding in untracked sources PHP 144,000 (per month)

Basis: 60 leads a month are untracked today. Assumption: they close at your 20% rate. Valued at PHP 12,000 typical deal.

Gap to your six-month goal of 25 jobs a month PHP 504,000 (over 6 months)

Basis: Target 25 jobs a month versus 18 today. That is 7 extra jobs at PHP 12,000 each, over six months.

Total estimated cost of inaction: PHP 316,800 per month, PHP 2,404,800 over six months.

8. Compliance

No compliance flags in knowledge base v1 for this vertical.

9. Next steps

- 1. Book the 30-minute call to walk through this blueprint (scheduler below).
- 2. Confirm scope: hubs, seats, and the custom items list in section 6.
- 3. Launch in 2 to 3 weeks, then a 30-day tuning review of workflow performance.
