

REVENUE OPERATIONS BLUEPRINT

We run a dental clinic in Ilocos with four chairs and general plus cosmetic dentistry. | Medical | Prepared 22 September 2026

1. Executive summary

We run a dental clinic in Ilocos with four chairs and general plus cosmetic dentistry. You currently bring in about 80 leads a month and close 60 (75%), running on no CRM (manual tracking) with Microsoft Excel, WhatsApp, Meta Ads, Google Ads. This blueprint moves you to Sales Hub Professional plus Service Hub Professional, installs a single-call pipeline across 3 lead sources, and works towards: 30 percent more bookings and fewer no-shows. Estimated cost of inaction: PHP 258,000 per month.

2. Recommended HubSpot stack

- Core: Sales Hub Professional
- Add-on: Service Hub Professional
- 2 hub(s) x 3 seats x USD 90 per seat per month = approx. USD 540 per month

List price, USD per seat per month, from knowledge base v1. Regional and committed pricing varies. Confirm at the build call.

- Sales Hub Professional is the floor: the build requires workflows, and Starter cannot run them.
- A Service Hub seat for the front desk gives you ticketing, no-show tracking, and post-visit follow-up in one place.

3. Pipeline architecture

Single-call pipeline (one-call close). Every stage can advance on one conversation. Speed and first-response time are the differentiators.

- Stages: New > Contacted > Qualified > Proposal > Closed Won > Closed Lost
- Workflow: Same-day reminder for the first visit
- Workflow: No-show win-back after 48 hours
- Workflow: 6-month recall for routine patients

4. Lead source architecture

- Google (30/mo, tracked): HubSpot form with a source field and monthly volume tracking
- Referrals (12/mo, not tracked): Referral landing form plus a shareable tracking link for every customer
- Walk-ins (40/mo, not tracked): Mobile quick-capture form, plus a 30-day manual entry discipline while the habit forms

5. Tool mapping (current -> recommended)

- Microsoft Excel -> Consolidate. Move tracking into HubSpot objects and properties. Keep Excel for one-way reports while the habit forms.
- WhatsApp -> Keep. Connect it to HubSpot so conversations attach to the right contact and deal.
- Meta Ads -> Keep. Connect to HubSpot Ads. Route the best-landing ads to a dedicated landing form.
- Google Ads -> Keep. Connect to HubSpot Ads for automated tracking and contact-level reporting.

6. Build plan

Confirmed defaults (included in the tier):

- Contact, company, and deal objects
- Email sync for every sales seat
- Pipelines, deal stages, and basic dashboards
- Task management and reminders
- Sequences (included with Professional)

Custom items to create for you:

- Pipeline: medical pipeline with 6 stages, matched to your one-call close pattern
- Custom properties from your answers: product, list price, deal size, fulfilment status, and lead source volume
- Form and tracking for: Google
- Form and tracking for: Referrals (currently untracked, this brings it into view)
- Form and tracking for: Walk-ins (currently untracked, this brings it into view)
- Workflow: Same-day reminder for the first visit
- Workflow: No-show win-back after 48 hours
- Workflow: 6-month recall for routine patients
- Dashboard: monthly leads, closed deals, close rate, and pipeline value by source

7. Cost of inaction (from your numbers)

Deals lost to slow follow-up PHP 24,000 (per month)

Basis: 80 leads in, 60 closed, 20 slipping each month. Assumption: 20% of slipped deals are winnable with faster follow-up. Valued at PHP 6,000 typical deal.

Value hiding in untracked sources PHP 234,000 (per month)

Basis: 52 leads a month are untracked today. Assumption: they close at your 75% rate. Valued at PHP 6,000 typical deal.

Closing a 30% growth gap PHP 648,000 (over 6 months)

Basis: Your goal states 30% more. That is 18 extra deals a month at PHP 6,000, over six months.

Total estimated cost of inaction: PHP 258,000 per month, PHP 2,196,000 over six months.

8. Compliance

- HIPAA: Patient data needs restricted access, field-level permissions, and a data processing addendum before any sync. In the Philippines, the Data Privacy Act of 2012 applies in parallel, so apply the stricter rule.

9. Next steps

- 1. Book the 30-minute call to walk through this blueprint (scheduler below).
- 2. Confirm scope: hubs, seats, and the custom items list in section 6.
- 3. Launch in 2 to 3 weeks, then a 30-day tuning review of workflow performance.
